|  | 22.3 | 13 | 29 | 27 | 22 | Z+1 | 70 |

## Using the ring size chart correctly

The millimeter (mm) measurements in the left-hand column are written to one hundredth of a millimeter for accuracy.

Round up to the nearest whole millimeter when the number is 0.50 or more
OR
Round down to the nearest whole millimeter when the number is 0.49 or less

Example: If the ring size diameter is 22.33 mm , we will round down to 22 .

The ring should be snugly fit into your finger. It should not be too tight or too loose.

## Easy way to measure your ring size

If you have a ring, but you do not know the size. Simply, take a piece of an A5 or A4 paper and fold it into a pyramid cone. (See instructions below)

## DEEMA \& CO.

International Size Guide for Rings, Bracelets, Necklaces

If you do not have a ring, do not use a string to measure as it is usually inaccurate (instead go to any jewellery store to get the right size or purchase a ring sizer).

Note: as a ring has a different width and bottom thickness and, which will affect ring size. The ring in the image has a 3 mm width and 2 mm bottom thickness. This is the reason why a string would not be the best instrument to measure a ring size.

Alternatively, you may download an app on "RingFit".

## Bracelet/ Bangle

## How to determine your size?

Measure your wrist with a flexible measure tape to obtain the right size. If you don't have a measure tape, you may use a string. After which measure the string with a ruler.

| XS | S | M | L | XL |
| :---: | :---: | :---: | :---: | :---: |
| $15-17 \mathrm{~cm}$ | $17-19 \mathrm{~cm}$ | $19-21 \mathrm{~cm}$ | $21-23 \mathrm{~cm}$ | $23-25 \mathrm{~cm}$ |
| $6-6.7$ inches | $6.7-7.5$ inches | $7.5-8.3$ inches | $8.3-9.1$ inches | $9.1-9.9$ inches |
| Suitable for <br> toddlers | Suitable for <br> teenagers and <br> women with thin <br> wrists. | Suitable for <br> teenage boys and <br> the average size <br> women. | Usually fits the <br> average men. | Usually fits for <br> body size which is <br> bulkier. |
